

# PARENT CONSENT FORM

Hi parents,

This year, your child’s teacher will be using an online math tool called Knowledgehook. Students will get their own student accounts to answer questions assigned by the teacher and to sometimes share their work into a portfolio. This work can only be seen by your child, you, and the teacher.

We take student and teacher privacy seriously at Knowledgehook and do not share or sell information to outside parties. We encourage you to explore what we do to protect privacy by visiting our Privacy Center at [knowledgehook.com/privacy-center](https://www.knowledgehook.com/privacy-center).

For more information about Knowledgehook:  
Go to [www.knowledgehook.com](https://www.knowledgehook.com) or contact [support@knowledgehook.com](mailto:support@knowledgehook.com)

Yes, I give permission to create a student account for my child and allow my child to use Knowledgehook in the classroom and for Knowledgehook to collect, use and disclose the information about my child within the terms set forth in the Knowledgehook Privacy Policy.
